Dhaka, Bangladesh

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience building high-impact Android and cross-platform mobile applications. Proven track record delivering fintech and MFS solutions at scale, including apps with 50M+ downloads. Experienced in leading features end-to-end, from architecture to App Store release. Currently seeking to apply 5+ years of Flutter and mobile expertise in the industry, with additional experience in AI/ML research and LLM integration.

TECHNICAL SKILLS

Mobile Development: Android Native (Kotlin), Flutter (Dart), MVVM, MVC, MVP, Riverpod, GetX, Provider, Hilt, Coroutines, App publishing in Google Play Store and App Store

Web Development: React, Node.js, Django, Django REST Framework,

Databases: MySQL, PostgreSQL, NoSQL, Firebase

Security & Integration: SSL Pinning, eKYC, Biometric Auth, Device Binding, Push Notifications, Crashlytics

Tools & Platforms: Git, CI/CD (Jenkins), Google Play Store, Apple App Store, Android Studio, XCode

AI & Machine Learning: Logistic Regression, LDA, Decision Trees, Naive Bayes, SHAP Analysis, LLM/AI Agent/ChatBot development

WORK EXPERIENCE

Independent Learning & Open Source Remote

May 2025 – Present

Self-Directed

- Developing React projects to expand into modern web frontend development, building production-level UI components.
- Developing an AI agent chatbot using LLMs, published on GitHub, demonstrating initiative in current technologies.
- Deepening full-stack knowledge to bridge mobile expertise with web and AI capabilities.

Red.Digital IT Limited Dhaka, Bangladesh

July 2021 – June 2024

Senior Software Engineer

- Contributed to the complete revamp of MyRobi (50M+ downloads) and MyAirtel (10M+ downloads) Android apps — implementing account management, feature search, in-app Play Store reviews, and Material3 UI (Kotlin, Coroutines, Retrofit).
- Led end-to-end development of dCloud, a digital financial app for FSIB PLC (Android & iOS), delivering eKYC, send money, mobile recharge, utility bills, biometric login, and device binding (Flutter, Riverpod, Dio, SSL Pinning, Crashlytics).
- Delivered key Android features for Trust Axiata Pay (TAP) MFS app (500K+ downloads) - new UI, custom keyboard, DPS features, eKYC liveness, achieving 99.92% crash-free stability (Kotlin, MVVM, Hilt, Navigation Component, LiveData).
- Built FirstCash MFS application from scratch in Flutter supporting customer, agent, and merchant workflows with send/request money, utility payments, and Google Maps integration across Android & iOS.
- Developed Smart LPG, a Flutter distribution and inventory management app with real-time location tracking for customer, agent, and delivery roles (GetX, Google Maps, Crashlytics).
- Mentored team members on clean architecture patterns, code reviews, and best practices; recognized as Star Developer in 2021 and 2023.

MADD Technology Dhaka, Bangladesh

November 2020 – June 2021

Software Engineer

- Built and published Community Connect, a Flutter app with MVP architecture for workflow management on Android & iOS, integrating Google Maps for site authentication, attendance tracking, and dispute resolution (Python, Django, DRF, MySQL).
- Developed an eKYC Admin Portal in Django enabling customer registration, verification, and search with MySQL backend.

Software Engineer

- Developed an Airline Ticket Booking middleware using Django, handling booking workflows and database operations (Python, DRF, MySQL).
- Designed and built EduHub, a cross-platform education application for Android & iOS using Flutter with Provider state management.

RESEARCH EXPERIENCE

Pervasive & Cloud Computing Lab (PC2L)

August 2018 – March 2024

Research Assistant (Part-time)

- Focused on machine learning models, data processing techniques, uncertainty reduction, and interdisciplinary AI applications.
- Applied Logistic Regression, LDA, Decision Tree, and Naive Bayes classifiers; led SHAP analysis for feature interpretation.
- Funded by King Fahd University of Petroleum & Minerals - Interdisciplinary Research Center for Intelligent Secure Systems (IRC-ISS).

EDUCATION

Jahangirnagar University

July 2026 – Present

Master of Science in Information Technology

North South University

May 2013 – August 2018

Bachelor of Science in Computer Science & Engineering

Thesis: A Queuing Theory Based Algorithm for Parking Space Sharing

AWARDS & CERTIFICATIONS

- Red.Digital IT Ltd - Star Developer Award (2021 & 2023); Medal for MFS and Distribution projects (2022)
- Appreciation letter from CIO and SEVP, Community Bank Bangladesh Limited
- Machine Learning by Andrew Ng - Coursera
- Top-up IT Training - Levering ICT for Growth, Employment and Governance Project, Bangladesh Computer Council

CONFERENCE PRESENTATIONS

- ICIET 2018 — Presented at the University of Dhaka, December 2018
- ICPP 2020 — Presented virtually, University of Alberta, Edmonton, Canada, August 2020
